

RTSO-7001 is an industrial-grade carrier based on ATLAS 200 module, which makes full use of ATLAS interface resources and integrates a variety of edge computing application scenarios. It can be connected to a wide range of input voltage of 7~20V and meet the working temperature of -40~+85 °C. Suitable for a variety of industrial sites.

Product standard

USB	2 x USB3.0 TYPE A interface(5Gbps,1A Max supply current), 1 x Micro USB interface, Support USB slave device
Network	2 x GbE (Exchange extension)
SD	1 x SD card slot
Serial port	2 x UART
SPI	2 x SPI
I2C	2 x I2C
Power requirement	+7V~+20V
Size	94mm*54mm*22mm
Operating temperature	-40~+85°C
Weight	50g

Physical connection with Atlas200 module
