

RTSO-9003 Carrier Board

PN: RTSO-9003

Adaptive NVIDIA JETSON TX2/TX2i/TX2-4GB

Version: V1.0

RTSO-9003 is a low-cost, small-size carrier board adapted to the NVIDIA Jetson TX2 module. The length and width of the carrier board are the same as those of the NVIDIA Jetson TX2 module, meeting the needs of compact deployment. For industrial deployment projects, the main interface has been designed for electrostatic safety protection, a high-reliability power supply scheme is adopted, a variety of interfaces, and the carrier board all use industrial components.
